

RÜSCH CRYSTALCLEAR PLUS

Better comfort and more safety for user and patient

AT A GLANCE

- single-use system for infection prevention
- flexible inner cannula system* for ease of handling
- colour-coded tube neckplate and inner cannula stopper for quick and safe size identification
- pilot balloon valve sealing cap
- thermosensitive tube material for greater flexibility
- soft, open, transparent fixation flange for comfortable fit
- continuous X-ray marker along the tube shaft
- integrated rotating 15 mm connector
- sterile, latex-free, for single use

* patent pending

COMFORT & EFFICIENCY

Our CrystalClear Plus tracheostomy tube set is an advanced tube system with a flexible inner cannula system. It is distinguished by top quality, cost effectiveness and greatest wearing comfort. Simple and safe to use it renders the care of tracheostomy patients comfortable and efficient.

SAFETY & EASE OF HANDLING

CrystalClear Plus is a single-use system which helps to reduce the risk of infection to a minimum, as the specially designed inner cannula system protects the inner tube lumen from secretion. Removal of secretions is simple and efficient at an early stage of accumulation through frequent changes of the inner cannula,

and well-aligned accessory parts assist the patient in clearing mucus. With cuffed tubes, a pilot balloon valve cap is premounted to protect the valve and the inflated cuff.

BROAD SIZE RANGE

Our CrystalClear Plus is available from sizes I.D. 3.5 to 10.0 mm, in 0.5 mm steps. The optimum I.D. and O.D. ratio between tube and inner cannula ensures best possible results, both in paediatric as well as adult applications.

CRYSTALCLEAR PLUS SET (with cuff, Ref. 12 13 03, without cuff, Ref. 12 13 00)
